

The book of **PEASE HOMES** for 1956

A wonderful adventure in living...

the planning and building of a new home!

You are beginning one of the most rewarding adventures modern life can hold
... the planning and building of your new home.

Your hopes . . . wishes . . . dreams . . . all are embodied in your vision of a home that is distinctively yours, reflecting your way of living. Others, before you, have had similar dreams and desires. You'll see how some of the thousands of Pease Home owners secured their *personalized* home in the full color photographs on the pages that follow.

Pease Homes are deliberately designed for utmost flexibility to bring your new adventure to a thrilling conclusion. From a wide selection of floor plans, you choose the basic "pattern of living" that fits your family best. Then your own tastes determine the final appearance and atmosphere of your Pease Home.

The result is a home, exclusively yours, *different* from all other homes . . . yet better built through modern production, and at less cost through mass factory purchasing of the finest materials.

Settle back now for an armchair tour of the colorful 1956 line of Pease Homes. At the tour's end you'll find complete specifications, prices and information. There is a handy request form, too, which will bring answers to any questions you may have about Pease Homes.

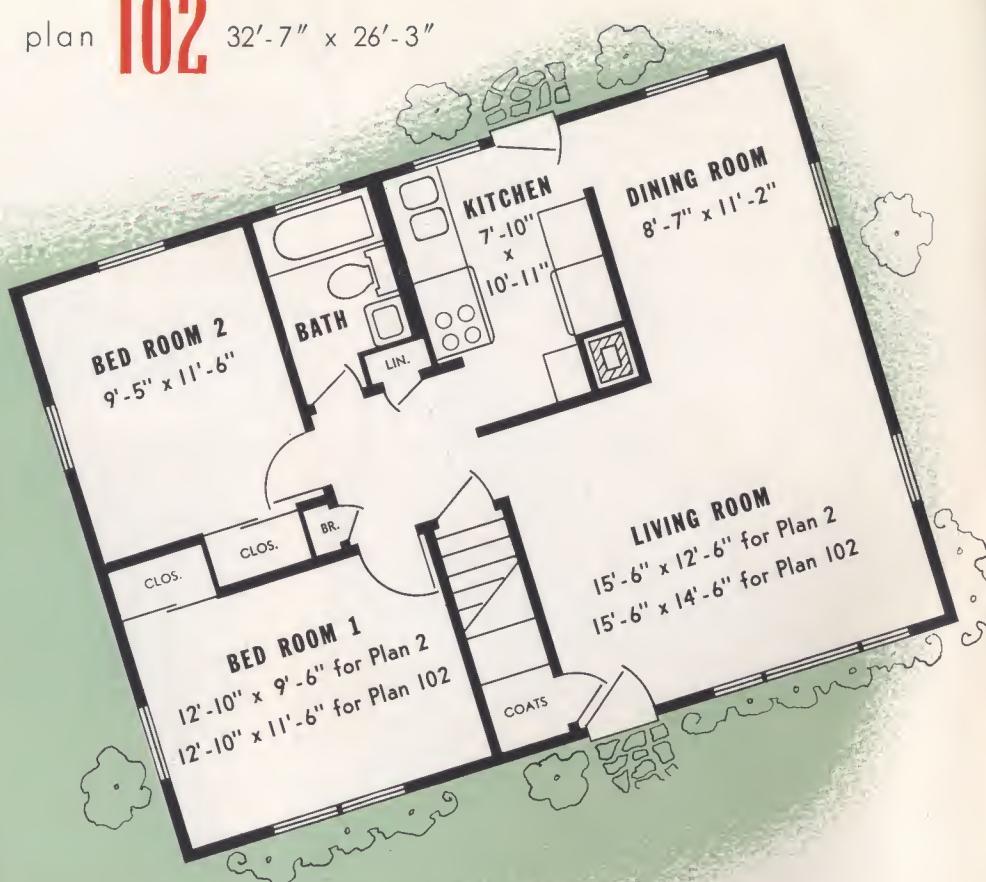

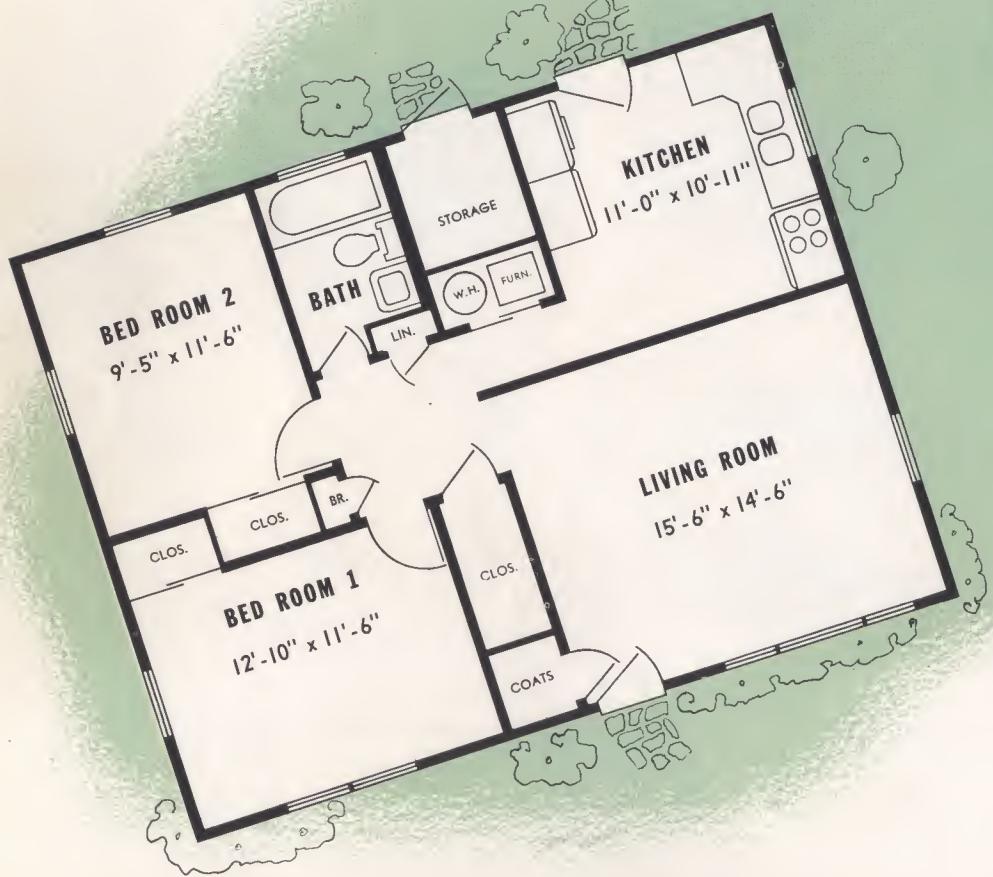

Begin your personal
PEASE HOMES
tour here . . .

There is no better way to choose a home than to see for yourself. That's why we urge you to visit "America's most unique and permanent model home showroom" . . . an entire block of nine finished Pease Homes, open every day from 8 A.M. to 6 P.M. across from our plant at 900 - 951 Forest Avenue, Hamilton, Ohio. Thousands of families visit here each year, making themselves at home while they plan, select, study and compare the homes in this "showroom" of Pease Homes. One of the homes is even partially cut away inside to demonstrate every quality construction feature from top to bottom. There is also a salesroom with representatives on hand to furnish any information you may desire, or to assist you in placing an order.

FOR BASEMENT plan 2 32'-7" x 24'-3" • plan 102 32'-7" x 26'-3"

Your armchair tour begins with the Brookwood . . . where you discover living that's efficient, yet comfortable. With the living, cooking, sleeping and bathing areas centered around the hall, Brookwood living is streamlined . . . there's no lost motion.

In the kitchen, you're just a few steps from children in the bedroom . . . from the delivery man at the door . . . from the dining area. Within easy reach is everything needed to run the household. Cleaning is fast and easy, freeing more time for leisure activities.

Generous sized rooms assure a variety of pleasing furniture groupings. The second bedroom may be adapted as a child's room, as a guest room, or for use as a TV room.

All in all, you find the Brookwood compact . . . efficient . . . easy to maintain . . . livable. It's ideal for the smaller family.

FOR CONCRETE SLAB plan 101 32'-7" x 26'-3"

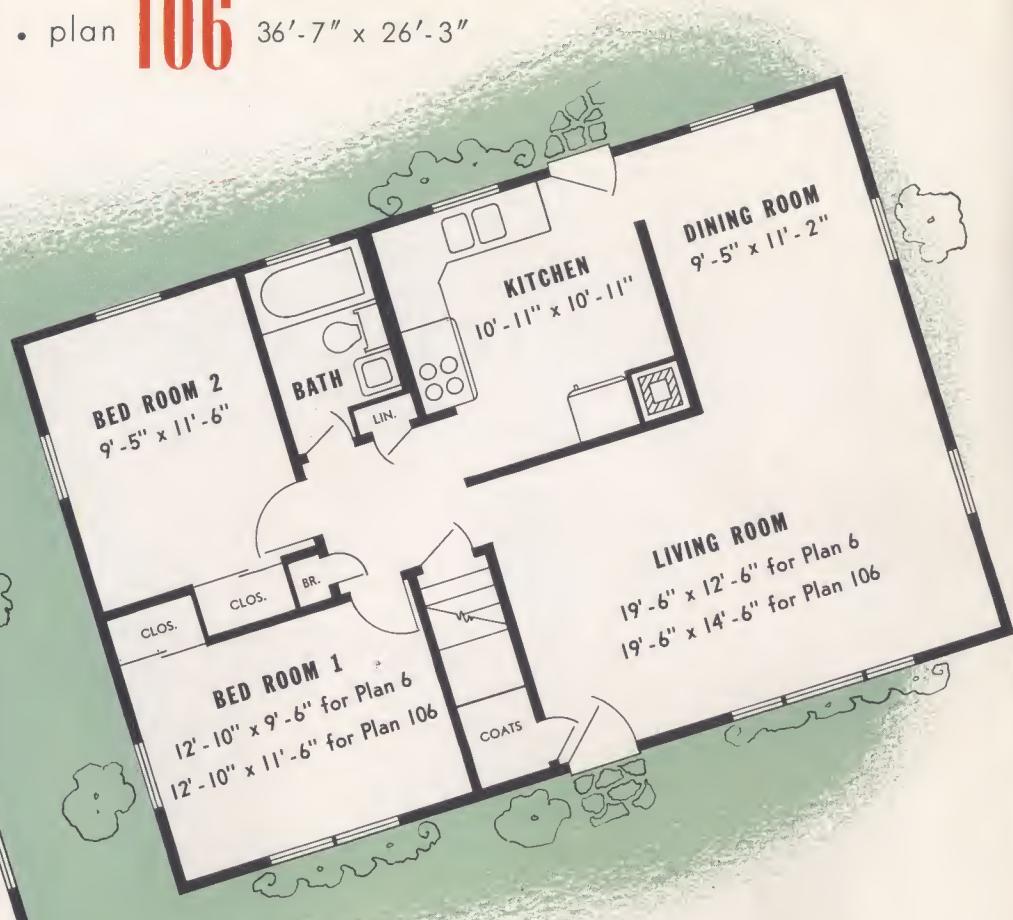

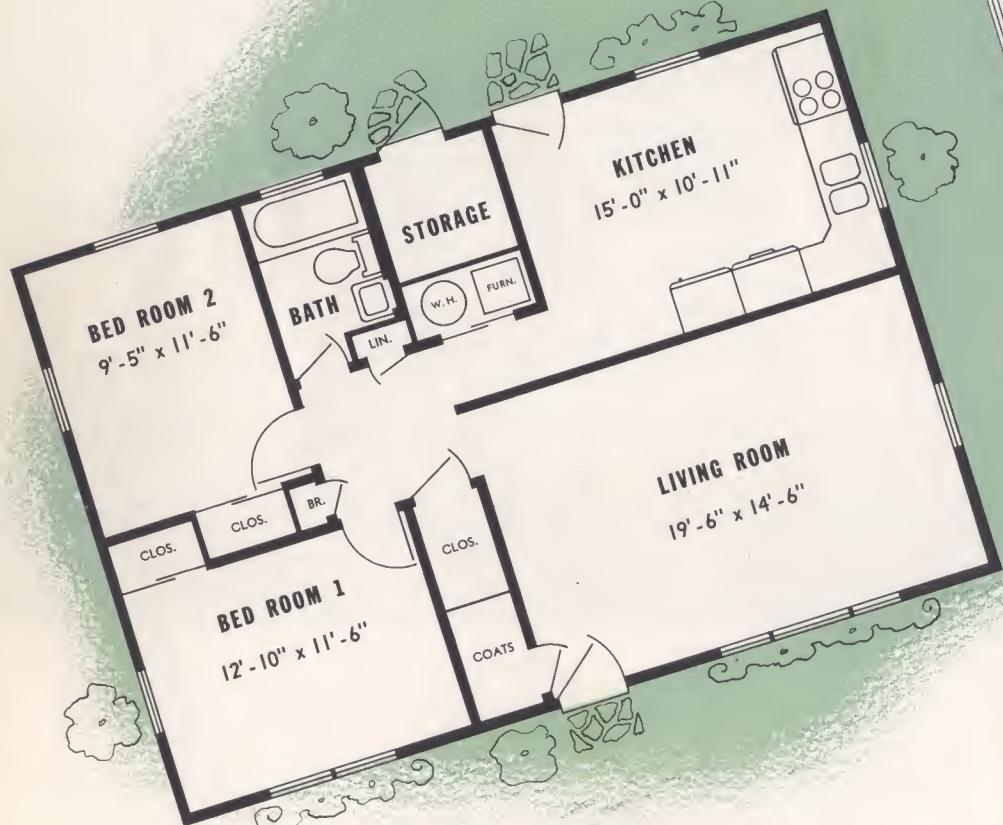

The Brookwood

an efficient, compact 2 bedroom home

The home shown here includes the following alternates and extras: Broadside shingles with partial 1x10 vertical siding and partial stone veneer; 3 in 12 pitch roof with wide cornice overhang; Glass-Wall section 2 wide 2 high (2 ventilating) in place of Panorama window in living room, Glass-Wall section 1 wide 2 high (1 ventilating) on side of living room; single Slide-A-Sash #144 in bedroom; 2 - 8x6 - 8 #297-D door in side of dining room; #297-N front door; wood combination doors; and tension screens. The Maywood . . . a home with a purpose . . . providing 3 bedrooms in a rectangular plan . . . for the ever-expanding needs . . . and the budget . . . of a young, growing family.

You live efficiently in the Maywood . . . with no compromise on comfort or convenience. In your large master bedroom . . . close to each child's room . . . you are instantly alert if they cry . . . yet remote enough to sleep later on Saturday morning when they're already out to play.

There's room enough for a family breakfast in the 13 foot kitchen . . . plenty of space for dining in the living room of the concrete slab plan. In a basement plan, your living and dining blend in the open living style room arrangement.

In either plan . . . there's no wasted space, yet no crowding . . . for your growing family.

FOR CONCRETE SLAB plan 141 36'-7" x 26'-3"

The Maywood

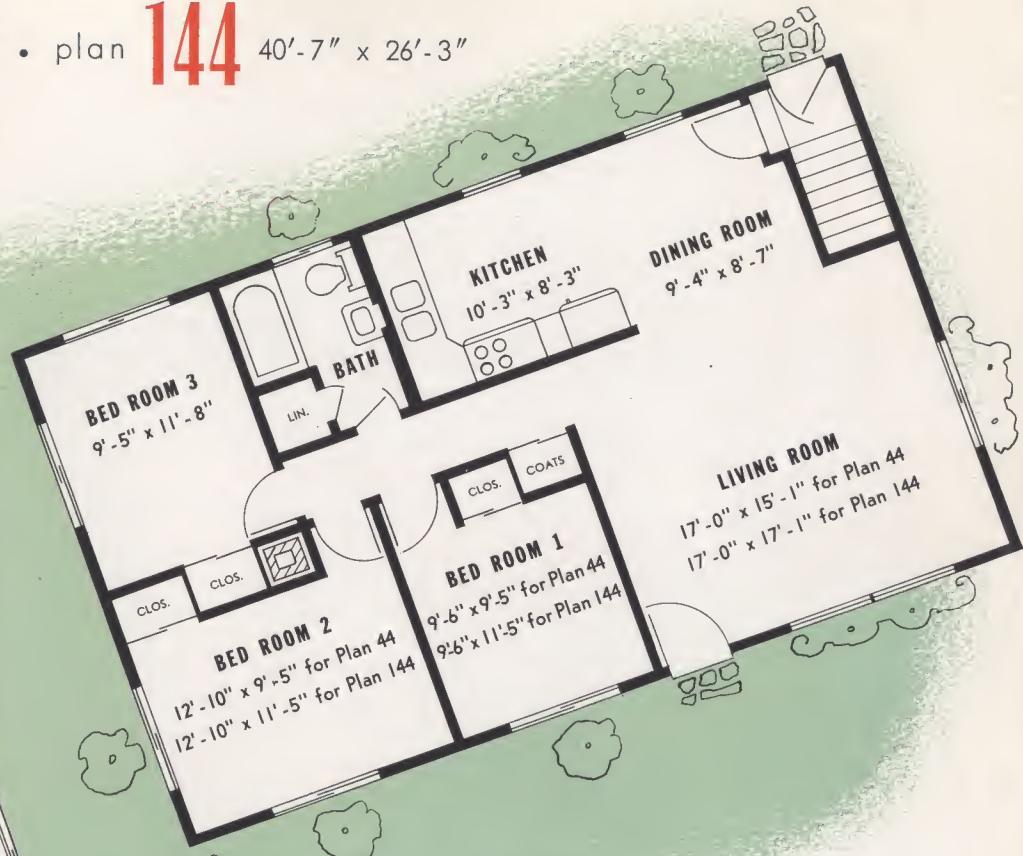

3 bedroom home for growing families

The home shown here includes the following alternates and extras: Broadside shingles with partial 1x4 rustic cedar siding and partial brick veneer for front elevation of home and garage; #297-B front door; single 28x28 Slide-A-Sash on side of living room and 16x28 Slide-A-Sash in side of kitchen omitted; attached garage #A 1224, door to front; single 28x28 Slide-A-Sash in side of garage; 34" overhanging cornice on front elevation of home and garage; and tension screens. (Masonry material is not included.) For complete prices, see pages 64 to 71 and page 73.

The Oakwood isolates your sleeping area . . . lets you enjoy a larger living and dining area. By withdrawing the bedrooms down the long hall, it separates living and sleeping . . . a boon to families with children.

In the living area . . . a songfest springs into action as friends visit late with you. In the bedrooms . . . sleeping tots gain a full night's sleep undisturbed, awaken alert and bright-eyed. During the evenings, your studious individuals will seek a haven in the bedroom for study, while the rest of the family enjoys the large, square living room.

Lots of roomy storage space pleases everyone . . . gives them places to keep their particular treasures. The direct outdoor entrance to the basement protects the living area from wear of muddy feet, or the clutter of tools and other work-a-day items.

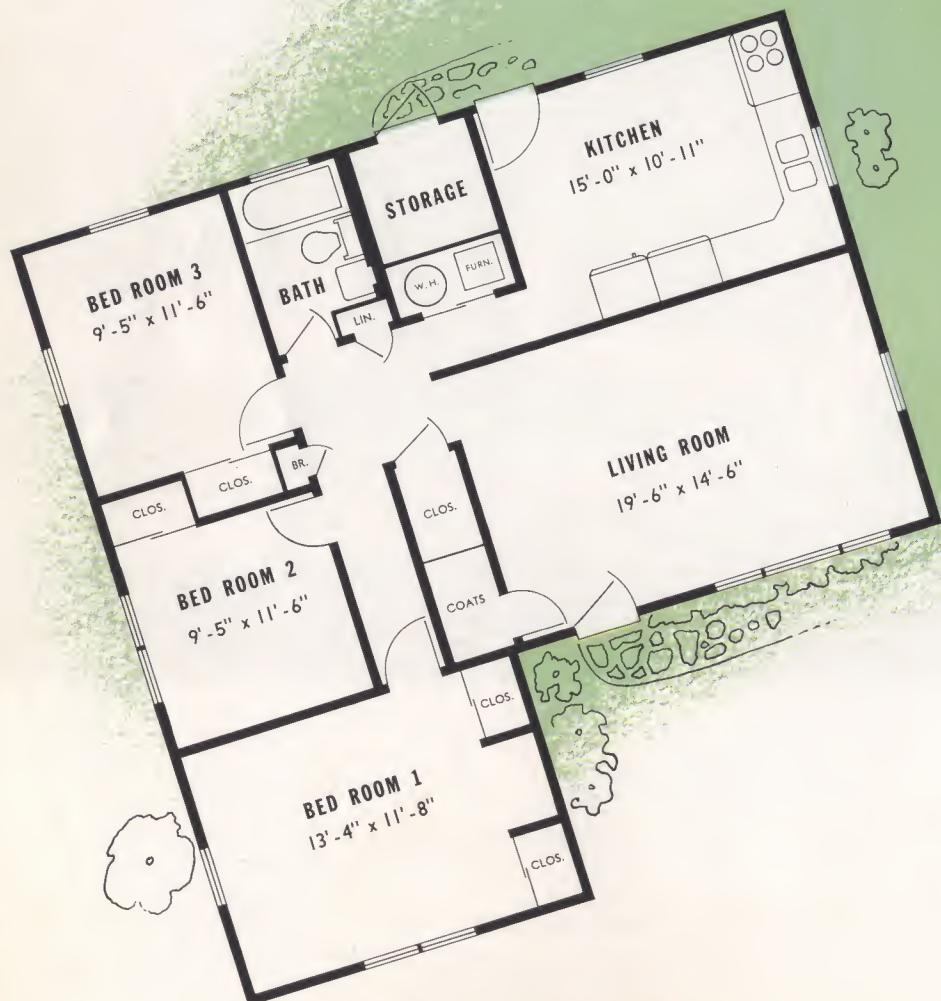

The Oakwood

3 bedroom home with spacious living area

The home shown here includes the following alternates and extras: $\frac{1}{2}$ x8 bevel siding for home, breezeway and garage; 34" overhanging cornice for front and rear of home, breezeway and garage; two #2466 Glass-Wall sections in front of living room; #297-A front door; breezeway #B 1224 with ornamental iron columns in place of wood columns, attached garage #A 2424, doors at end; twin 28x28 Slide-A-Sash in place of blank wall panels on front of garage. For complete prices, see pages 64 to 71 and page 73.

You're at an important milestone in your armchair tour . . . the L-shaped homes. The Hillwood illustrates at once the advantages of 3 bedrooms combined with an efficient living plan.

Picture your friends . . . visiting you in the long Hillwood living room . . . with the table set for a snack later in the full sized dining room. Your entertaining takes place in the large living areas . . . yet the entire sleeping wing of your home is secluded.

The central hall puts you within a few steps of any room . . . children can come from outdoor play . . . enter through the kitchen . . . have access to the bath . . . never track through living or dining areas.

Generous extra storage . . . in the guest closet . . . in the bedroom closets . . . in linen and broom closets . . . helps keep everything in place and reduce household chores.

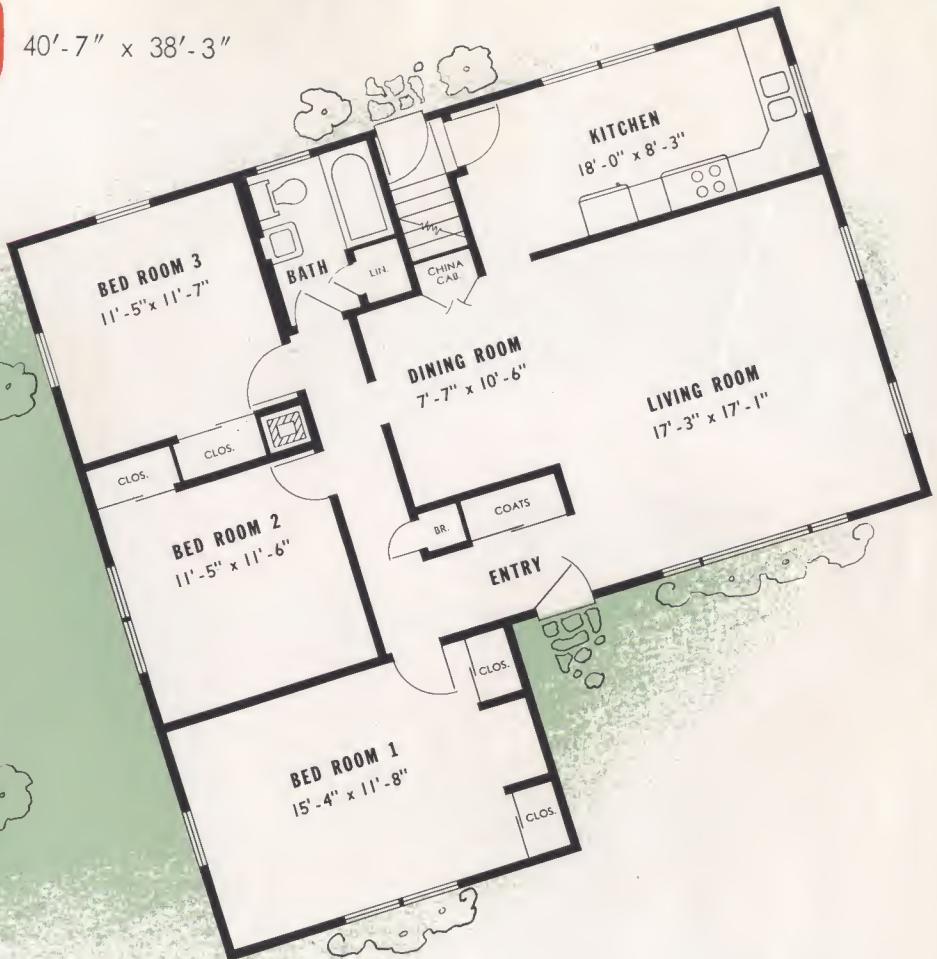

The Hillwood

an L-shaped 3 bedroom plan

The home shown here includes the following alternates and extras: Brick veneer for entire home, with partial 1x4 rustic cedar siding and $\frac{3}{8}$ x10 bevel siding on front gable; 34" overhanging cornice for front of home and garage; Glass-Wall sections 2 wide 3 high (4 ventilating) in living room; twin 28x28 Slide-A-Sash in front bedroom; blank wall panels in place of windows on garage side of living room; attached garage #A 1224; single 28x28 Slide-A-Sash in side of garage; aluminum combination doors; and tension screens. (Brick veneer is not included.) For complete prices, see pages 64 to 71 and page 73.

From the moment you step into the entry . . . you feel the graciousness of living afforded in the Innwood.

There's no abrupt intrusion as guests enter. They exchange greetings with their hostess in the entry, where a large closet accepts their coats.

The dining - living area offers flexible dining facilities . . . where a candlelit full course banquet, or a light summer buffet is equally appropriate.

The extra-large kitchen aids food preparation . . . provides loads of room for family meals . . . has direct service entrance to basement.

You live . . . and entertain . . . graciously, in the Innwood.

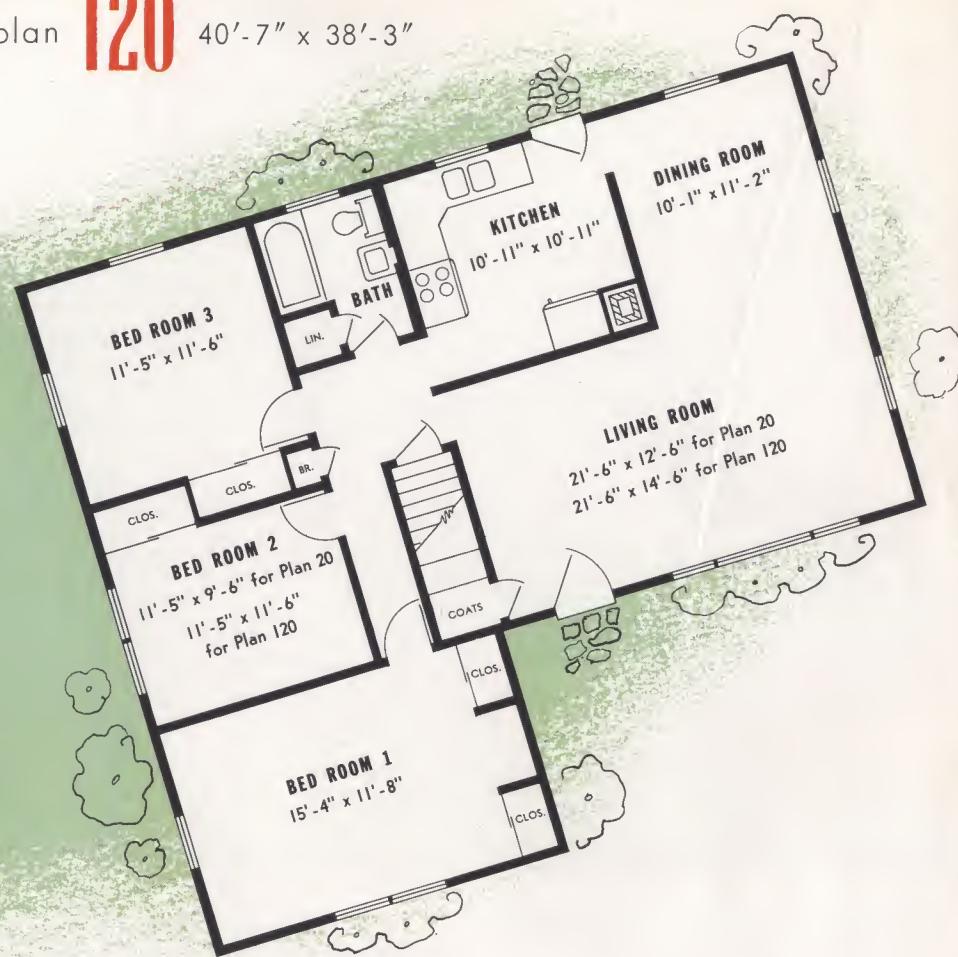

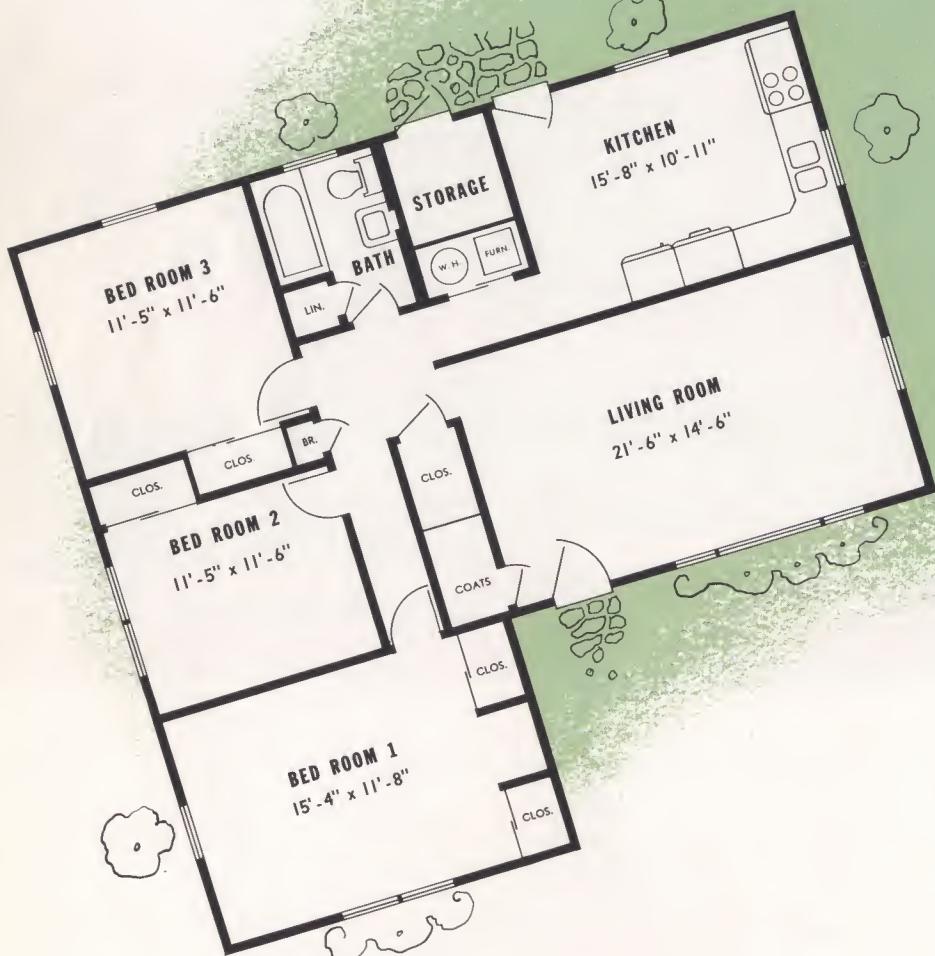

The Junwood

gracious living 3 bedroom home

The home shown here includes the following alternates and extras: 3 in 12 pitch roof; 4" gable projection; 1x10 vertical siding with batten strips every other joint and partial brick veneer; #297-N front door; twin 28x28 Slide-A-Sash in front bedroom; Glass-Wall sections 2 wide 2 high (2 ventilating) and one #2466 (stationary) in living room; twin 28x28 Slide-A-Sash in side of living room; and single 16x28 Slide-A-Sash in kitchen. (Brick veneer is not included.) For complete prices, see pages 64 to 71 and page 73.

Newest . . . largest . . . designed with unique concept of versatility and adaptability . . . the new Broadwood home.

Your Broadwood . . . is a town house . . . a rambling ranch style . . . a suburban contemporary . . . depending on your tastes and location. From a single basic floor plan, you can re-arrange the Broadwood to suit your way of living.

In any setting . . . the Broadwood is built on a sweeping flow of space . . . with oversized rooms . . . creating a modern mansion on a grand scale. Extra spaciousness is the keynote of every room.

The paved entry and foyer command your entrance into the ballroom-sized living room . . . further on, the dining room doubles ordinary dining space . . . and is served from a U-shaped work area in the kitchen . . . where the modern day counterpart of the old fashioned pantry provides extra food storage.

A large family activities room, with a "pass-through" from the kitchen, takes the daily wear off the formal living and dining areas. Two baths and a lavatory . . . outdoor patio . . . all are features of a new home truly majestic in scope.

The Broadwood

luxurious, adaptable 7 room mansion

The home shown here includes the following alternates and extras: Type A 2420 attached garage; $\frac{3}{4}$ x10 bevel siding with partial stone veneer; 13" projecting level cornice for front and rear elevations of home and garage; 8" projecting gable cornice for all gables; #293 front door with #293-S sidelights; 5 pairs of outside blinds; picture sash #1534 in dining room, and picture sash #1634 in living room replacing insulated glass; two flat Vineyard design ornamental iron porch columns; and two single 32x24 window units in place of blank wall sections on front of garage. (Masonry material is not included.) For complete prices, see pages 64 to 71 and page 73.

PEASE HOMES

offer endless variations

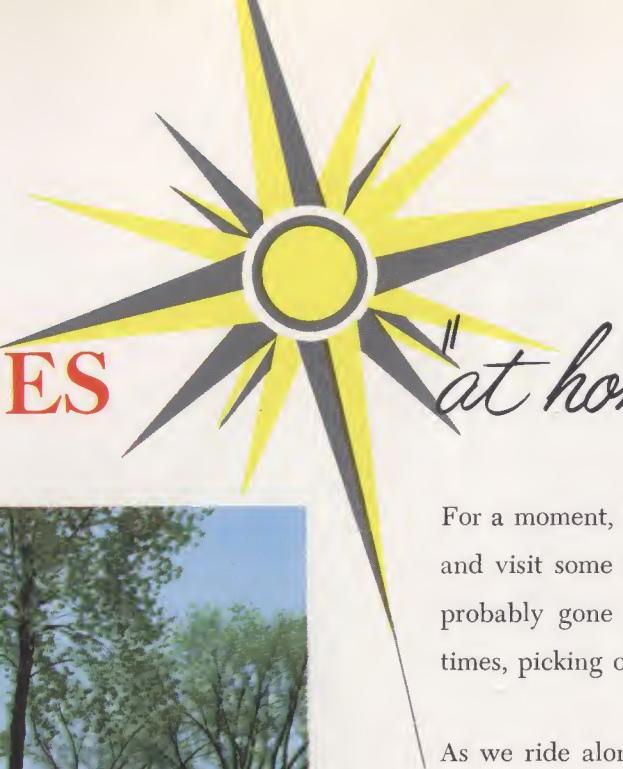

Your armchair tour through the numerous Pease plans on the preceding pages undoubtedly impressed you with the wide variety of basic Pease Homes available. That's just the beginning! Now you can really start being choosy.

Pease Home flexibility actually allows you to shape your home around your family pattern of living. Select a Rectangular, L-shaped, + -shaped, or T-shaped plan, or, better yet, create your own H-shaped or U-shaped home by the addition of porches, breezeways, garages.

Shown here are just a few of the unlimited possibilities with Pease plans to help stir your imagination.

PEASE HOMES

"at home" everywhere

Narrow lot . . . sunshine bright blend of stone and color . . . a livable, lovable home. Sheltered entrances . . . enclosed rear porch . . . this Cliffwood is a friendly home . . . anywhere.

For a moment, let's forget floor plans and dimensions, and visit some distinctive Pease Homes. You've probably gone "window shopping" like this many times, picking out the home you'd like to own.

As we ride along, you're going to see Pease Homes of all sizes in many different settings. Each home, however, has a charm all its own . . . an individual style created with Pease Home flexibility.

Pride of home ownership depends greatly on this freedom to make a home look different . . . look "best in the block." Whatever price home you choose, wherever you build, your Pease Home will make you feel "at home" with the finest!

*A rural Longwood . . . low . . . sweeping . . . a highlight of brisk color
offsetting its fresh, white clean lines . . . enclosed breezeway and two car garage
. . . enhance the long look . . . touched with the color of country skies.*

Textures of stone, wood and glass . . . multi-patterned among the trees . . . sun-streamed solarium . . . wide balanced width . . . a refreshing and gracious hillside Longwood.

PEASE HOMES

are flexible

Color . . . that blends sky, earth and lawn . . . enclosed garden entrance . . . the Longwood with an interesting treatment . . . hiding the garage in a second wing . . . a modern ranch home.

Variegated patterns of brick . . . set off by the gleaming white garage door and gable . . . the Longwood. Colonial windows . . . a subtle mixture of their reserved styling with the panoramic picture effect . . . a sound home in excellent taste and timeless design.

PEASE HOMES

are distinctive

A home with a flair . . . from the car port . . . to the home – widening low brick wall. This Innwood home uses an overhanging cornice to fend off the prying sun . . . and just the suggestion of a fence to enclose the porch . . . truly up-to-the-minute styling.

*Long . . . low . . . livable . . . mellow cream and
red-speckled brick . . . the lines are crisp . . . firm . . .
a Longwood . . . lengthened by breezeway
and garage . . . an expansive, distinctive home.*

PEASE HOMES

are spacious

Again, the Longwood . . . in a rolling away-from-town locale . . . where the pleasant countryside is drawn in through cool shaded window walls . . . where country air whisks lightly through the screened breezeway . . . an atmosphere of relaxed living . . . a haven from the bustle of the outside world.

Ground hugging lines . . . low stone planter . . . extended living room . . . brick wall blending garage and home . . . a design of extraordinary length . . . the impressive Longwood.

PEASE HOMES

are versatile

The Maywood home . . . projecting cornice shades windows from summer sun . . . large glass areas permit low-angle winter sun to warm and brighten the interior . . . lengthened roof and horizontal lines . . . provide modern low silhouette.

Neat as a pin . . . and no wonder! Low 3 in 12 pitched roof . . . clean lines . . . huge window area . . . clever contrast of white walls with soft-toned stone . . . this is the streamlined Innwood home.

PEASE HOMES

are individual

The Kirkwood . . . 'mid sunlight and shadows . . . tall trees . . . soft breezes . . . where windows capture dancing reflections . . . link the home with the world . . . for indoor-outdoor living . . . an ideal blend of home and setting.

*The incomparable ranch home . . . long, longer, longest
. . . rambling under cool, shadowy eaves . . . across an acre of
sunshine. This roomy Longwood home . . . a tribute
to its owner's imagination!*

PEASE HOMES

are adaptable

Exclusive . . . luxurious . . . blending indoor-outdoor living through glass walls . . . where a window planter adds the indoor spot of green. There's a new and gracious way of living . . . in this distinctive Shorewood home.

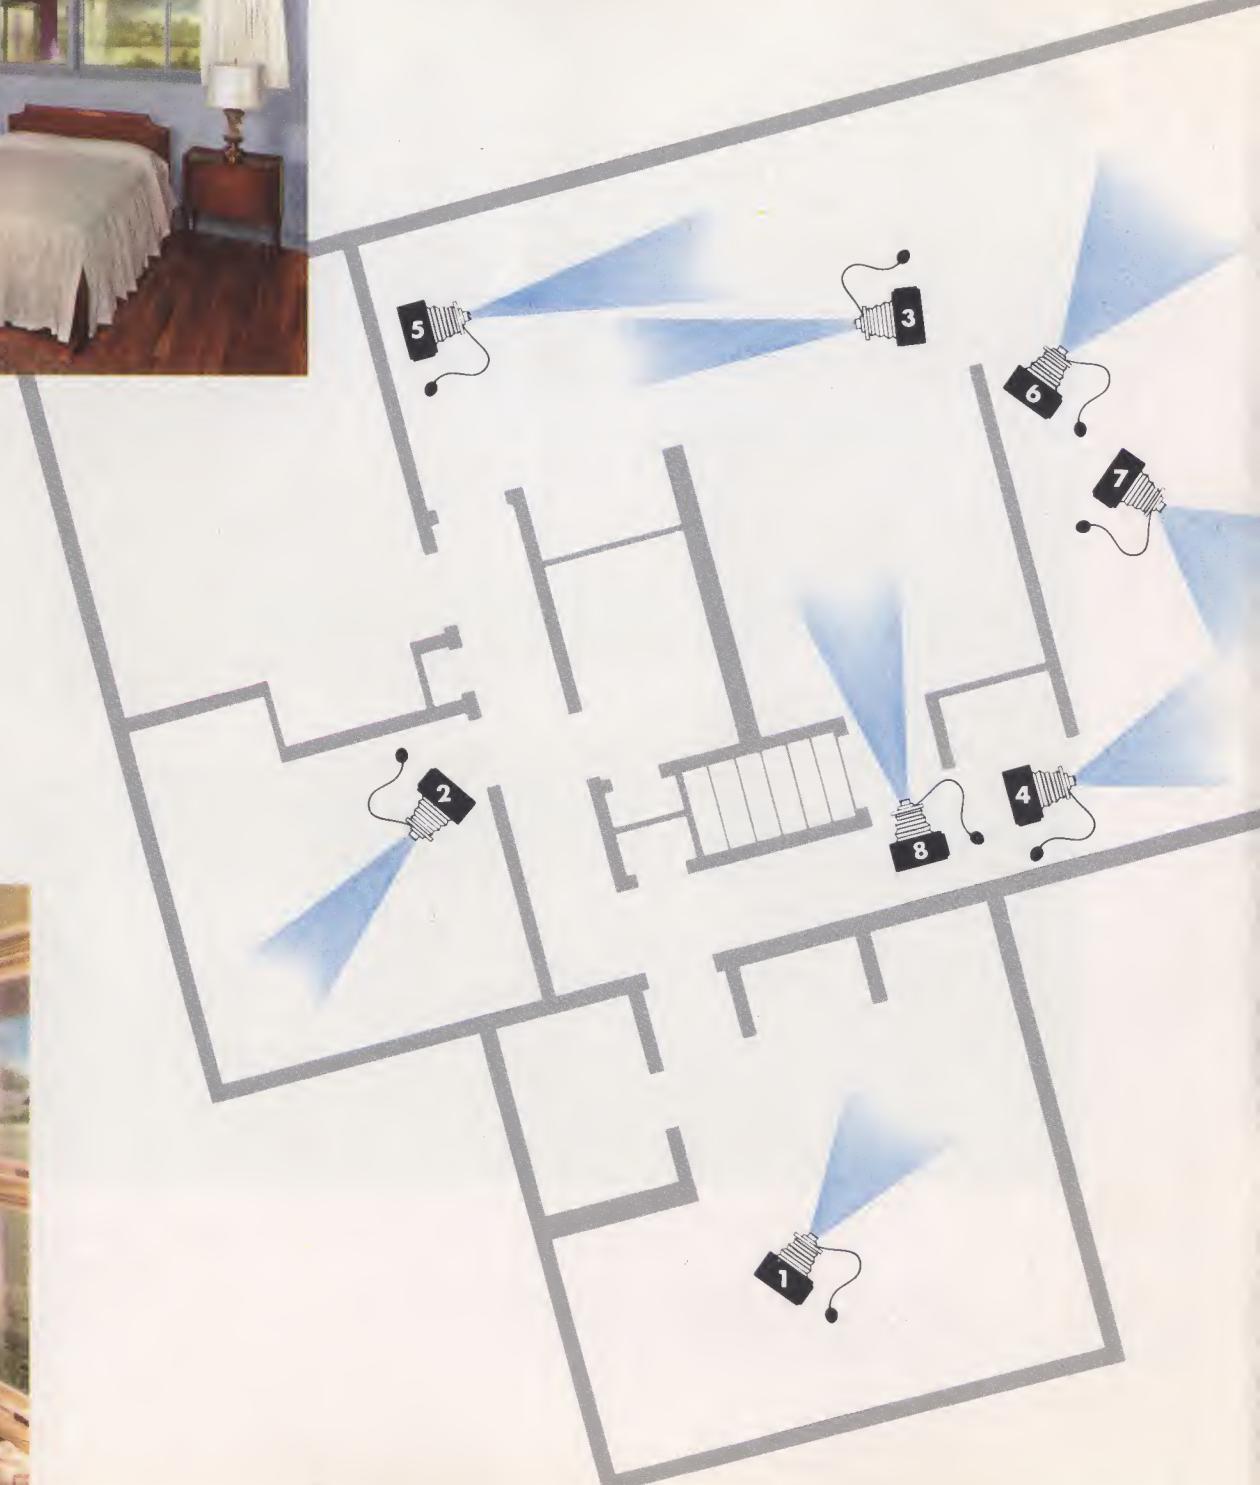

2. Child's Bedroom is "grown-up" in size.

1. Light, airy Master Bedroom.

3. *Door open – TV Room . . . closed – extra bedroom.*

5. Glass wall brings outdoor flavor to indoor dining.

6. Spacious living room . . . unlimited decorating possibilities!

7. Huge Glass-Wall areas . . . enjoy outdoors all year 'round.

**picture tour

PEASE HOME

4. Secluded entry . . .
a "welcome" convenience!

Beauty is not just "skin deep" in Pease Homes. Step inside this Shorewood, for example. Its modern, open-plan living typifies the unlimited decorating possibilities, the fun of planning and living, in any of the 34 plans available from Pease.

Follow the camera in the plan at the left as it sweeps through this magnificent home. We think you'll agree that a Pease Home is beautiful . . . from any angle.

8. Breakfast bar, built-in oven . . . a dream kitchen!

A 16'0" x 24'3" open breezeway, Type B 1624.

open breezeways

A 12'0" x 12'3" open breezeway, Type B 1212.

When you add a breezeway to your Pease Home you add a porch, covered passage to the garage, and a "longer look" all at one time. Breezeways are available 12'0" wide by 12'3" deep for use with detached garages, and 12' or 16' wide by 24'3" or 26'3" deep for use with attached garages, to form a continuous roof line — see page 70 for list of breezeway sizes and type numbers.

The prices of breezeways, as shown on page 70, include roof trusses, $\frac{1}{2}$ " plywood roof sheathing, $\frac{1}{2}$ " plasterboard for ceiling, asphalt roofing materials, wood lintels with trim and 4 whole and 4 half 6"x8' wood columns. Separate plans are available for all attachments, such as breezeways, attached and detached garages, porches or carports, and will be included at no extra cost, when specified, in sets of plans ordered for a Pease Home — see page 63 for details.

A Full Front Porch, type P 2210, on a Plan 20 home.

porches

An 8'10" x 8'0" Front Porch, type P 808, on a Plan 10 home.

A 6'0" x 12'0" Front Porch, type P 612, on a Plan 20 home.

A 12'0" x 24'3" Side Porch, type P 1224, on a Plan 22 home.

Four types of porches are available for Pease Homes. The Side Porch can be used with any Pease Home, while the rest are for any L-shaped plan or the T-shaped Parkwood plan. The Full Front Porch includes 6"x8" load bearing wood columns, roof rafters, $\frac{1}{2}$ " plywood roof sheathing, $\frac{1}{2}$ " plasterboard, tape and cement for the ceiling, 19" selvage slate roll roofing, cornice, wood lintels, etc. The 8'10"x8'0" Front Porch has two single and one corner ornamental iron porch columns (non-load bearing). The third type of porch for L-shaped plans is formed by using a 24'3" gable and trusses over the front bedroom. The projecting trusses form an open porch that is 8'0"x12'0" for Plans 10, 109, 110 or 138, and has 5 whole and 2 half wood columns. The same porch for Plans 119, 20, 120 or 140 is 6'0"x12'0" and has 4 whole and 2 half wood columns. Other materials for the porches are furnished in the proper quantities. The Side Porch is either 12'0"x24'3" or 12'0"x26'3" and is formed by adding roof trusses, like the home's, so that a continuous roof line is possible. 6"x8" wood columns, gable end, lintels, roofing material, $\frac{1}{2}$ " plasterboard for the ceiling, exterior trim, etc., are all included.

carport

The Carport, either 12'0" wide by 24'3" deep or 12'0" wide by 26'3" deep, adds extra width to the home and provides space and shelter for the car without loss of light or ventilation in the living room side of a Pease Home. Roof trusses, like those used in the homes, are furnished, thus making

an unbroken roof line. Roofing material (matching the home), gable end, wood columns, $\frac{1}{2}$ " plasterboard ceiling, lintels, cornice and trim are all included. The Carport is priced on page 70, under "Side Porch", and may be attached to any plan in the Pease Home line.

detached garages

one and two car

Detached garages for Pease Homes are 24'3" deep — made extra wide and deep for additional storage. The walls come in sections with 5/16" plywood sheathing applied and include the same quality materials, workmanship and easy field erection found in the homes. The roofs of all garages use roof trusses, the same as furnished for the homes. $\frac{1}{2}$ " plywood roof sheathing can be applied in a hurry. Ranch style (10 panel) or Colonial style (30 panel) garage doors are 9'x7', 1 $\frac{1}{8}$ " thick, sectional overhead type (complete with track, rollers, springs, cylinder lock and 2 keys). Kind and color of siding and roofing materials should be specified to match the home. Window and service door sections may be substituted for blank wall sections if desired, and are quoted on pages 66 and 67. Gypsum lath for walls and ceilings, if required, are quoted as an extra. Garages are sold and shipped only with an order for a Pease Home.

attached garages

one and two car

One car attached garages are offered in six sizes: 12' or 16' wide by 24'3" deep, 12' or 16' wide by 26'3" deep, and 24' wide by 12'3" or 16'3" deep. A 9'x7' overhead type garage door is furnished for placement in the front or rear of each 24'3" or 26'3" garage, or for the end of garages 12'3" or 16'3" deep.

Two car attached garages are available in five sizes: 20' or 24' wide by 24'3" deep, 20' or 24' wide by 26'3" deep, and 24' wide by 20'3" deep. The two 9'x7' overhead doors may be located in the front, side or rear.

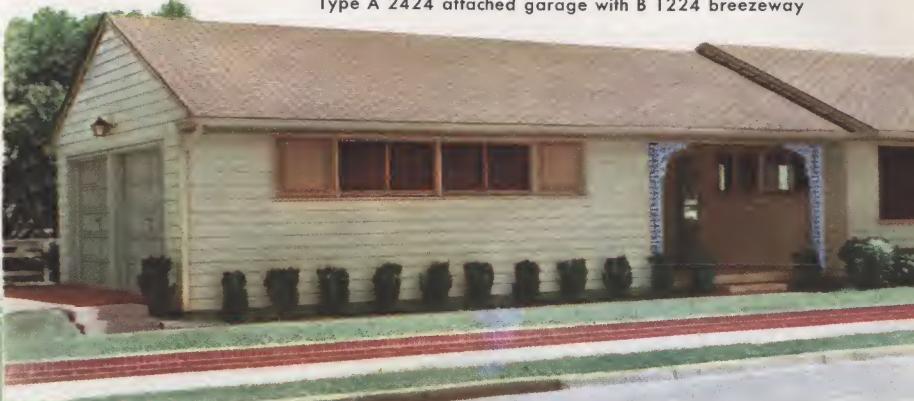

Since all attached garages have the "gable at end," a Pease Home can have the longer look of a continuous roof line by using a 20'3" deep garage (Type A 2420) with Plans 147 or 148; or by using a 24'3" deep garage (Types A 1224, A 1624, A 2024 or A 2424) with Plans 2 through 44; or by using a 26'3" deep garage (Types A 1226, A 1626, A 2026 or A 2426) with Plans 101 through 144.

If an "offset" roof line is desired, types A 2412 or A 2416 can be used for any Pease Home. Type A 2420 will also give an offset roof line to Plans 2 through 44, and types A 1224, A 1624, A 2024 and A 2424 may be used with Plans 101 through 144 to achieve this effect.

All attached garages come complete, as described on the opposite page. For complete prices of garages and the breezeways that can be used with them, see pages 70 and 71.

Type A 2420 attached garage

Type A 2424 attached garage with B 1224 breezeway

Type A 1224 or A 1226 attached garage

Type A 2424 attached garage

choose *wood or steel* **for a**

The warmth, beauty and styling of natural wood is always appreciated, so why not turn the kitchen in your Pease Home into an exciting room with natural birch finished cabinets.

Pease Home kitchens now offer you a choice of natural birch finish hardwood cabinets (as standard), or enameled steel cabinets (as optional), with a continuous Formica top, as part of the base price of each home. You are actually getting a deluxe, space designed kitchen that exceeds FHA and VA requirements at no extra charge. There are more wall and base cabinets per kitchen than ever before, more unbroken worktop space, and the chance to choose some optional kitchen equipment of Tappan built-in oven and range, Waste-King food disposer, and exhaust vent fans, if desired. Each Pease Home kitchen has been carefully planned to provide maximum cabinet area and drawer space per foot of available wall space. Naturally, the floor plan governs the arrangement of cabinets in each home. On the individual plans purchased in advance of construction for \$10, kitchens are illustrated in detail, and include diagrams of alternate kitchen arrangements for Tappan built-in range and oven.

NATURAL BIRCH FINISH WOOD CABINETS

If it's the warmth and beautiful grain of furniture-finished natural wood to add color to your kitchen, then choose natural birch finish cabinets. The doors of these popular cabinets are faced entirely in selected kiln dried birch, while the drawer fronts, ends, etc. are made of other selected hardwoods. Each cabinet is completely and uniformly factory finished in a rich birch color. Doors have brushed bronze handles, and contoured drawer fronts glide out at the touch of a finger at any point along the recessed bottom edge. Free sliding, center guided drawers lock when fully opened to keep them from falling out. Corner base units have

deluxe kitchen in your

PEASE HOME

rotary shelves. The recessed toe strip on the base cabinets is finished in dark brown to match the cabinet styling. Each cabinet is individually carton packed and arrives assembled and ready for installation.

STEEL CABINETS IN WHITE OR COLORS, TOO

Those selecting the optional steel cabinets will receive Youngstown Kitchens' enameled wall and base units in a choice of white, dawn yellow, Meridian blue, or sunset copper. These cabinets are precision built with die-made construction eliminating sharp corners, and finished with a Hi-bake enamel that forms the smoothest surface for easiest upkeep. Insulated doors close quietly, drawers slide smoothly and lock so they can't be pulled out and upset, and the chrome hardware stays bright and shiny. Corner base units have rotary shelves. All cabinets are individually carton packed.

COLORFUL FORMICA COUNTER TOPS

All cabinet counter tops for Pease Homes are custom built of super smooth Formica in a wide choice of 8 patterns and 66 colors listed on page 68. Tops include a porcelain enameled double bowl sink, chrome mixing faucet, vegetable spray, 4" high Formica backsplash and edge binding of 1½" stainless steel. Alternate counter tops of Formica with roll-formed front edge and coved 4" backsplash are available in the colors and prices listed on page 68. A Waste-King food disposer may be installed in either bowl of the sink, and is priced separately on page 68 under kitchen variations.

Steel Youngstown cabinets in white (or a color) and a sweeping Formica counter top are reason enough for wanting to move into a new Pease Home.

The Pease Home office and factory at Hamilton, Ohio, covers almost three full city blocks, and includes the distinctive "Street of Pease Demonstration Homes," with guest parking area. The factory itself covers 250,000 square feet of floor space under roof, and is located on the B & O Railroad Toledo Division. Four private switches handle 24 box cars a day, while eight fully enclosed loading docks accommodate sixteen trailer trucks at one time.

A tour of the plant reveals that only top quality materials are used in Pease Homes. They are stored entirely under roof and out of the weather, and by constant turn-over, all material is new, clean and prime grade. High speed machinery, mechanical handling equipment and large scale production under controlled working conditions make factory assembly possible in less than one third of the time usually consumed in on-site construction. This saving in dollars and cents is reflected in the final cost of a Pease Home, when due allowance is made for the number of carpentry hours saved on the job. Pease Homes are made faster and better by careful planning and more efficient use of skilled labor. Thus, through better production comes better value at lower cost to you.

the
home of

PEASE HOMES

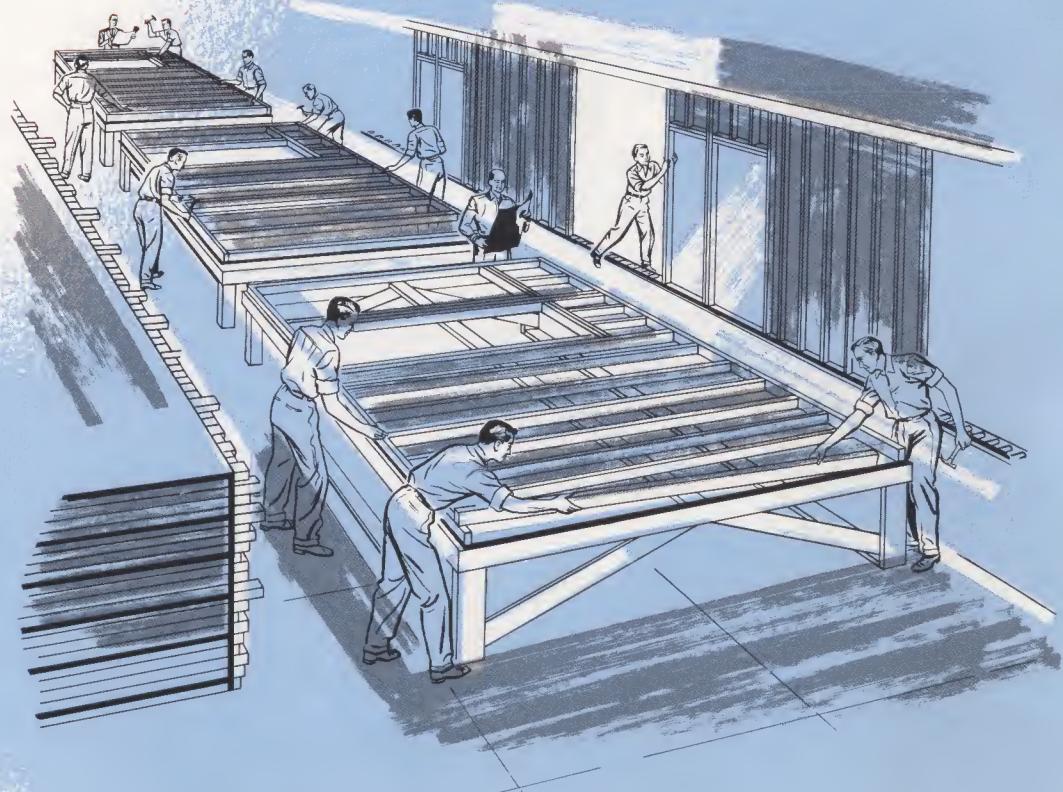

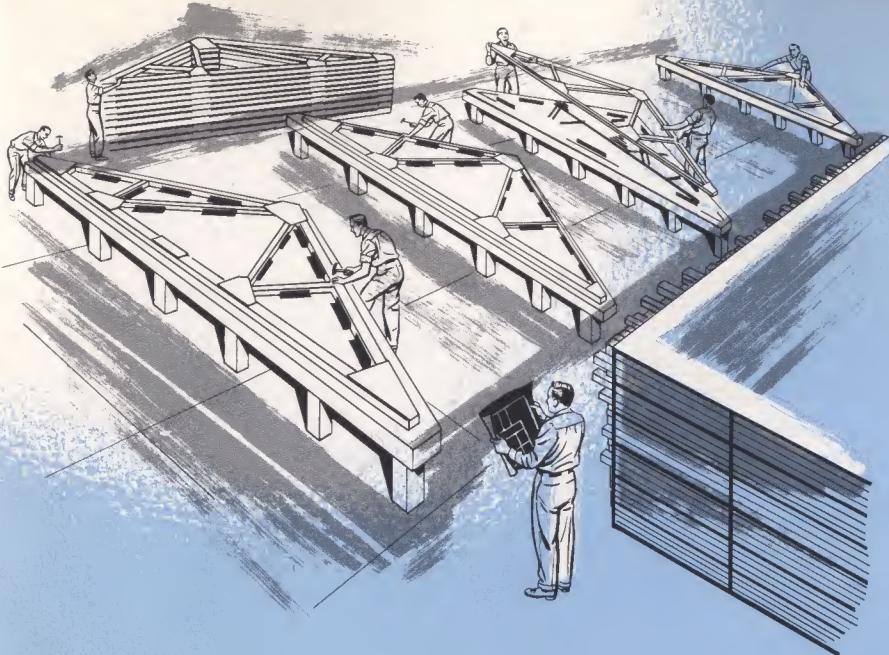

a PEASE HOME is born

volume production

Each operation becomes greatly simplified with quantity production. Certain men perform identical operations over and over, day after day. Not only do they gradually eliminate all waste motion, but their work becomes "second nature" to them and unit labor costs are reduced to a minimum. The illustration shows how interior partitions are "framed-up." The 2x4 studs are spaced 16" on center and doubled around all openings in load bearing walls. Continuous 2x4 plates are placed along top and bottom, then nailed to each stud with two 16d cement-coated spikes.

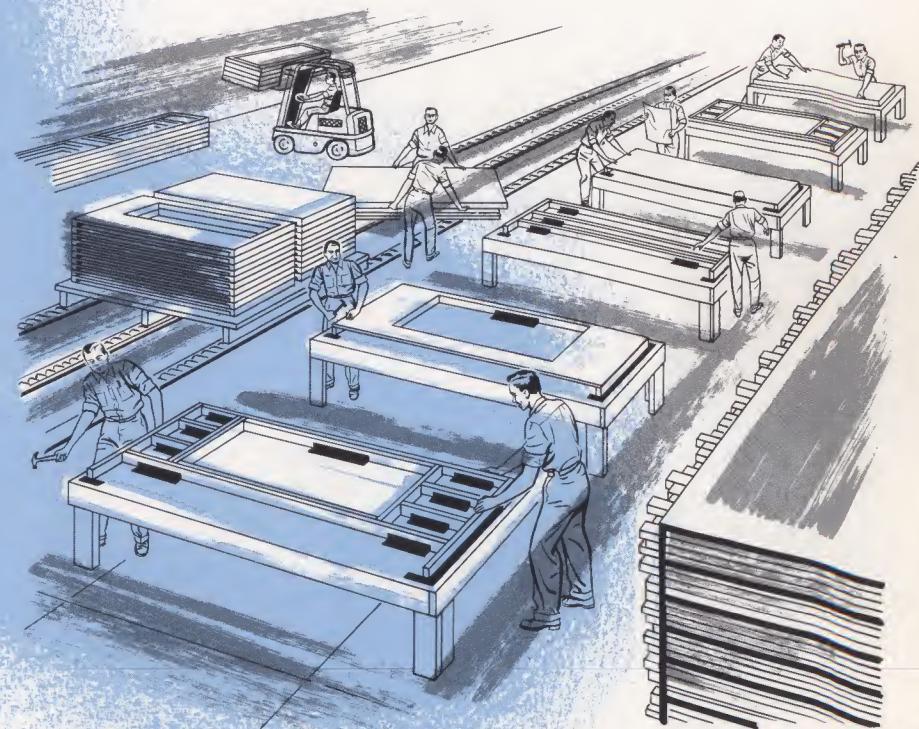

modern production methods

High speed modern machinery not only saves labor, but assures an accurate fit of each component part of each Pease Home. Lumber is brought to the saws on conveyors and taken away on lift trucks so that handling costs are a fraction of those incurred in unloading, piling, carrying, cutting and other piece-by-piece operations which are unavoidable when framing a home in the field. Year 'round production and comfortable working conditions enable our experienced craftsmen to factory-build your home to the highest standards.

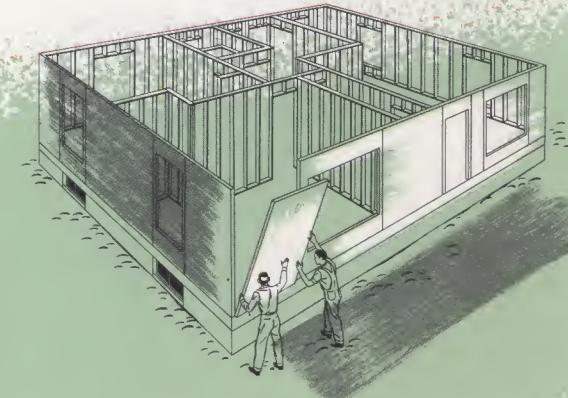

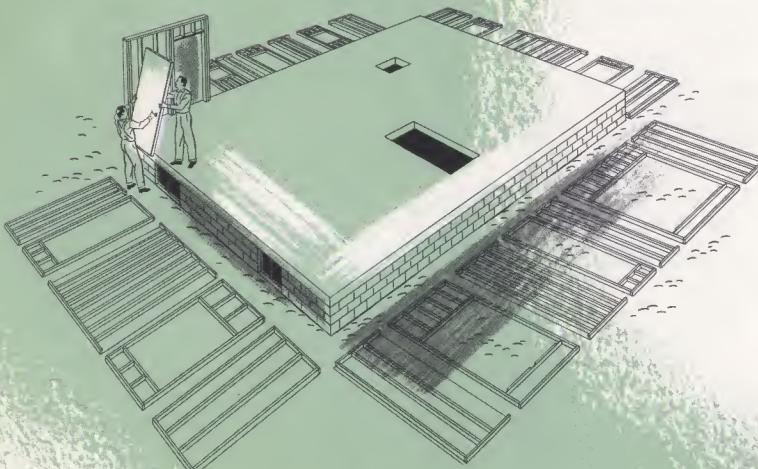

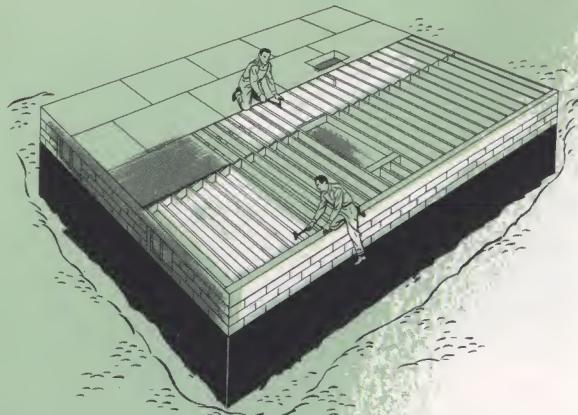

constant supervision

Our crew of experienced supervisors is constantly inspecting! They're purposely critical of every operation in order to maintain the high quality standards identified with every Pease Home. Roof trusses are an outstanding example. All joints are secured with plywood gussets glued over both sides then secured with special heavy nails clinched in place. You are assured of a home that combines true architectural excellence and modern design with highest quality materials and workmanship.

precision assembly

Accurate forms and jigs and modern assembly lines, turn out assembled house parts that form the home. Construction at the site thus becomes an assembly operation with reduced need for skilled craftsmen. This illustration shows how the outside wall sections are framed. Each 2x4 stud is double nailed at each plate with cement-coated spikes, after which 5/16" exterior plywood sheathing is nailed to one side. The sections are then stencilled, for easy identification at the job site, and moved to the loading docks for shipment.

Factory assembled parts are quickly set in place. Erection details are included in plans. These show how simply and easily Pease Homes go together. Construction of a home with basement, or over crawl space, follows conventional procedure until the basement or foundation walls are completed. These can be of concrete block, brick or poured concrete, and should be waterproofed on the outside before backfilling.

First make sure that the foundation walls are level and square and the aluminum basement windows are set. After the beam through the center is placed and levelled with supporting basement columns in place, the box girders are bolted into place. The box girders come assembled and notched to receive the first floor joists. No measuring is required as notches establish location of joists. The names of all wood members are stencilled on each piece for positive identification with references in plans and detail sheets. After the joists and two rows of bridging are installed, $\frac{1}{2}$ " Douglas fir plywood sub-floor is laid over the entire area.

PEASE HOMES

Next, lay the exterior wall sections around the outside of the building in their proper order. You can then start to erect them at ANY corner. If you prefer, each complete wall may be assembled as a unit on the floor, sheathing paper applied and then the assembled wall can be raised into place. The interior partitions are full room size and should be installed along with the exterior walls to brace them. The sections are simply nailed together – no bolts or tricky fittings. Plywood sheathing overlaps the stud at each joint tying adjoining sections together and adding extra strength.

As the studs are exposed on the inside of the exterior wall sections, the bottom plates are spiked to the joists (or bolted to the concrete slab) to anchor the walls to the floor (or foundation). Then, another overlapping top 2x4 plate is nailed to and ties the wall sections together entirely around the home. Truss type gables are placed on top of the end wall sections and secured in place at each end with metal truss anchors.

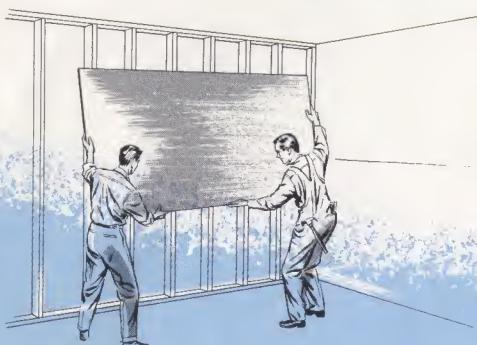

Pease Homes have trussed roofs and gables for greater strength and quicker field erection. The trusses come completely assembled and are slipped up over the side walls and secured in place (24" on center) with special anchors which we furnish. Trusses are properly spaced, then plumbed and $\frac{1}{2}$ " plywood roof sheathing is applied. The sheathing should be covered immediately with a layer of 15 lb. felt, and the asphalt shingles can then be laid. These come in "3-in-1" strips and are laid 5" to the weather for homes with 5 in 12 roof pitch, 4" to the weather for homes with 3 in 12 roof pitch.

Windows come assembled in complete units, glazed, weatherstripped and with overhead balances installed. They are simply set in the openings, levelled and then nailed in place. The outside doors and frames come assembled and are set in the same manner. For protection, the plywood wall sheathing should be covered with black sheathing paper as soon as possible after the walls are in place. Then furring strips and siding are applied.

PEASE

inside wall coverings

Pease Homes come with either gypsum plasterboard or lath (when plastered) for the interior surfaces of walls and ceilings. Plasterboard comes in 4'x8' panels and gypsum lath in 16"x48" panels. Either can be applied vertically or horizontally (as illustrated). The plasterboard or lath for the interior side of the outside walls has aluminum foil on the side next to the studs. This reflective insulation is also an effective vapor barrier and gives the wall a U factor of .26 which meets FHA or VA requirements in most areas.

insulation

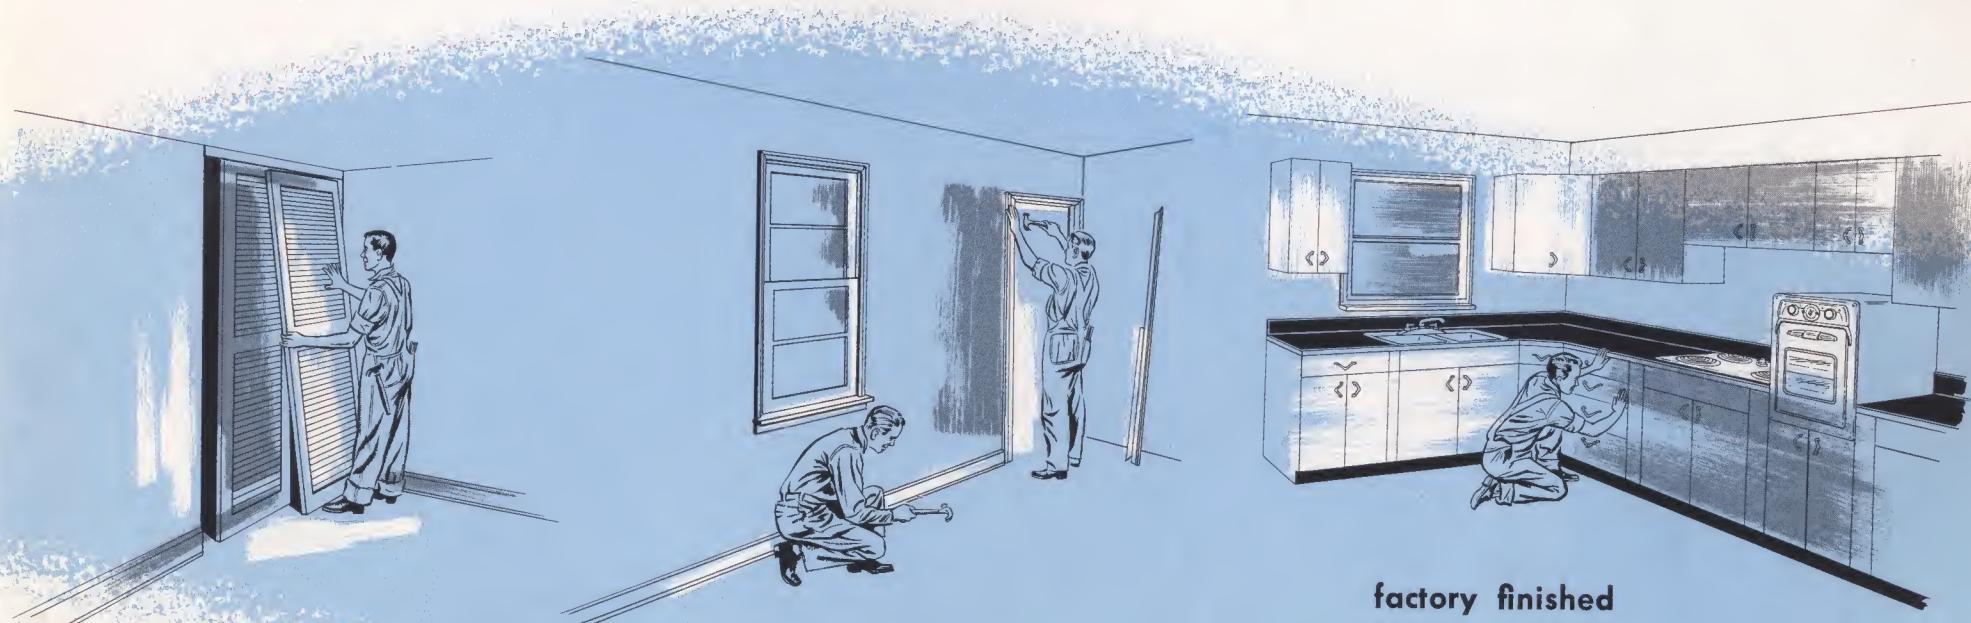

The principal heat loss in any home is through the ceilings. For this reason, we include 2" Fiberglas roll blanket insulation to be tucked between the bottom members of the roof trusses, just above the plasterboard or lath. For severe climates additional insulation for sidewalls is available and quoted as an extra on page 65.

interior trim

The interior trim for Pease Homes is all smoothly machined from kiln-dried ponderosa pine. The door jambs are cut to exact size and dadoed. The stops and casings are mitred and the window stools and aprons are "returned" at both ends. All these members come bundled together in sets for each opening and sets are carton packed for protection in shipping. Base and shoe are bundled in standard lengths. Metal closet shelving is included for all closets, and comes in a pre-finished metallic tan color. Clothes closets have 12" deep lower shelves with integral hanger channel and clothes hooks, and plain 16" upper shelves. Linen and broom closets have either 11½" or 16" plain metal shelves, depending on the depth.

HOMES *can be finished faster*

smartly modern interior doors

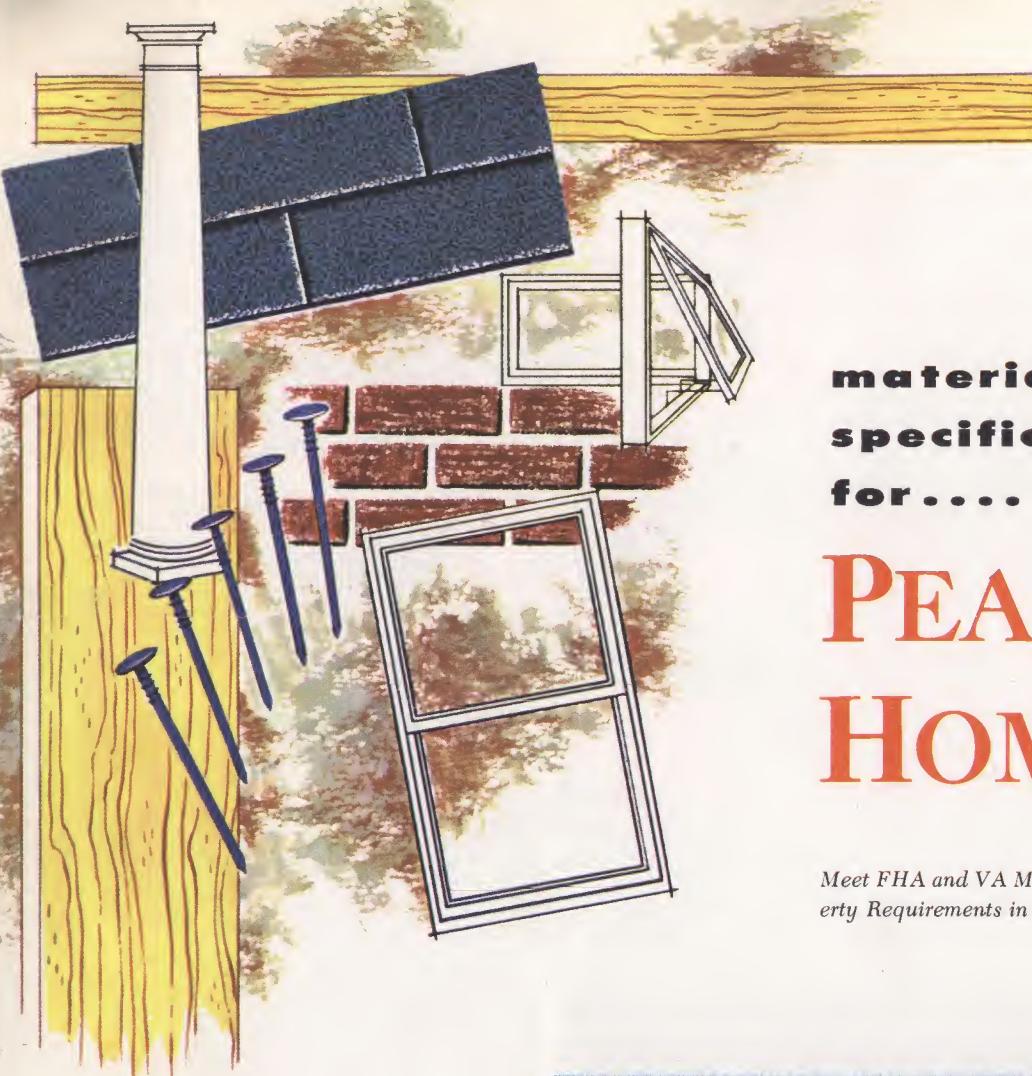

Sliding louver doors, furnished for all bedroom clothes closets, are 7'9" high, 1 $\frac{1}{8}$ " thick, and come complete with sliding door hardware. Openings are full closet width, providing front access to any part of the closet. All other interior doors have flush surfaces, are northern birch for natural or paint finish, and come prefitted to net size with 3 half hinges applied on door (the other halves are installed on the side jamb). Doors are bored for the tubular locks which are included.

soon ready for paint

While the trim and doors can be finished natural or stained, a painted or enamelled finish will conform best with modern home decorating standards. All interior plasterboard surfaces should first be "sized." If the walls of a room are painted, the wood trim and doors may be done in the same color or one which blends with it. If wallpapered, combinations of colors are effective. In homes with basements or those built over a crawl space, the oak floors should be sanded before the trim is painted.

factory finished kitchen cabinets

All Pease Homes have the highest quality, pre-finished kitchen cabinets available, either in hardwood finished in natural birch (as standard) or all steel cabinets as an optional choice. Wall and base units are individually carton packed, have the hardware applied and are ready for installation. Base cabinets have a continuous FORMICA top, with double bowl sink, in a choice of colors. Cabinets are arranged to best advantage around the kitchen in each plan, and actual installation takes only a little time. Both wood and steel kitchens have special cabinets available for built-in ovens and ranges, and are priced with the Tappan units on page 68.

**material
specifications
for....**

PEASE HOMES

Meet FHA and VA Minimum Property Requirements in most areas.

Superior structural standards in every Pease Home are assured through engineered design and pretested performance. This test, conducted by the H. C. Nutting Company, Testing Engineers and Chemists, shows an exaggerated load of over 15 tons of shingles placed on Pease Home roof trusses without the lower chord of the trusses going over the allowable degree of deflection.

BASEMENT WINDOWS

Aluminum, glazed with clear glass bedded in glazing compound. Aluminum screen is installed.

GIRDER AND COLUMNS

Three pieces 2 x 10 nailed together. Steel basement columns furnished as an "extra" (see page 69).

SILLS AND JOISTS

(For basement or crawl space plans only) Kiln dried fir or hemlock 2 x 8 spaced 16" o.c. for plans 2, 6, 10, 14, 20 and 22, 2 x 10 16" o.c. for all other plans, and doubled under all partitions parallel to joists. 2 x 8 solid bridging between joists. Metal joist anchors where required.

STUDS AND PLATES

2 x 4 kiln dried fir or hemlock, spaced 16" o.c. and doubled around all openings in bearing walls. Exterior walls and bearing partitions have single plate at bottom and double plate at top. All other partitions have single plate at top and bottom.

CEILING JOISTS AND RAFTERS

For all plans with pitched roofs, kiln dried fir or hemlock 2 x 4 built-up trusses, spaced 24" o.c. with $\frac{1}{2}$ " plywood gussets glued and clinched-nailed over each face of each joint in the truss. Metal anchors, to anchor truss ends to supporting walls, are included. (Truss test data available upon request.) Ceiling joists for flat roofs are 2 x 8 16" o.c. with metal bridging.

EXTERIOR WALL SHEATHING

5/16" 3 ply Douglas fir plywood. $\frac{3}{8}$ " x 1 $\frac{1}{2}$ " furring strips furnished loose for application over sheathing paper when Broadside shingles, bevel siding, rustic cedar siding or vertical siding are used as an exterior siding.

INTERIOR WALL SURFACES

$\frac{1}{2}$ " plasterboard or $\frac{3}{8}$ " gypsum lath for all interior walls; $\frac{1}{2}$ " insulating plasterboard or $\frac{3}{8}$ " insulating gypsum lath (both aluminum foil backed) for interior surfaces of exterior walls; $\frac{1}{2}$ " plasterboard or $\frac{3}{8}$ " gypsum lath for all ceilings (including porches and breezeways). Tape and cement are furnished for all plasterboard joints. Metal corner beads for outside corners are included. Inside corner and ceiling angle re-enforcement furnished with gypsum lath.

ROOF SHEATHING

$\frac{1}{2}$ " Douglas fir plywood in 4' wide panels.

SUB FLOOR

(For basement or crawl space plans only) $\frac{1}{2}$ " Douglas fir plywood in 4' wide panels.

FLOORING

(For basement or crawl space plans only) 25/32" x 2 $\frac{1}{4}$ " No. 1 common grade kiln dried oak, side and end matched, with $\frac{3}{8}$ " fir plywood for kitchen and bath. Clear grade unfinished or prime grade factory finished oak flooring optional (see page 65). Duplex kraft paper for application between subfloor and finished floor included.

NAILS

Common and finish nails are cement coated. Roofing nails are galvanized. Siding, shingle and cornice nails are solid aluminum with dull finish. 1 1/4" ringed nails are furnished for plasterboard. 1 1/2" blued nails furnished for gypsum lath.

SIDING

Broadside shingles, red cedar, consisting of 16" undercourse (natural) and 18" outer course (stained prime coat light gray) for application over 26 lb. black saturated sheathing paper and furring strips. Shingles come individually packed in bundles. *3/16" asbestos Flexboard in 4' wide sheets with 1 x 3 select fir or hemlock batten strips, 16" o.c., 1/2 x 8 or 1/2 x 10 clear red cedar bevel siding (with metal corners), 1 x 4 rustic red cedar siding or 1 x 10 clear all heart redwood siding for vertical application are optional. Bevel siding and rustic cedar and vertical redwood siding come in standard random lengths 3' and longer, unpainted. Natural stain and oil for redwood or red cedar siding are available (see page 64). For brick or stone veneer, sheathing paper and furring strips are furnished, wood siding is omitted. Same type window or door frames used on either kind of wall.

*Asbestos cement paint only should be used on 3/16" asbestos Flexboard.

ROOFING

240 lb. asphalt slate surfaced 3 in 1 strip shingles, laid over 15 lb. asphalt saturated felt 5" to weather for 5 in 12 pitch roofs or 4" to weather for 3 in 12 pitch roofs. Choice of 10 colors: black, green, red, silver gray, tan pastel, red pastel, green pastel, blue pastel, gray pastel, or brown blend. Built up roofing for plans No. 131 and No. 132 (flat roof) not included.

EXTERIOR MILLWORK

Clear ponderosa pine, west coast hemlock and/or clear Douglas fir, TOX-I-SEALED. Soffit of wide overhanging and projecting cornice is 3/4" Weldtex plywood - exterior grade.

INSULATION

2" Fiberglas roll blanket (paper enclosed) for ceilings included. 2" Fiberglas roll blanket for sidewalls is optional (see alternates and extras).

ATTIC VENTILATION

Is provided by 8 x 8 mesh galvanized hardware cloth applied to cornice soffit (1 1/2" wide for 4" standard cornice, 3" wide for 13", 34" or 42" projecting cornice or flat roof), sufficient to accommodate an attic ventilating fan. Attic ventilating fans available as an extra (see page 69).

WINDOW AND SLIDE-A-SASH FRAMES

Clear ponderosa pine, TOX-I-SEALED, with zinc ribbed weatherstrip at head, sill and the full width of jambs. Interlocking weatherstrip at check rails. 3 oz. copperbacked flashing is provided at heads.

SASH

1 1/2" thick, clear ponderosa pine, TOX-I-SEALED, glazed with clear flat drawn glass BEDDED in glazing compound, fitted for weatherstrip and hung on sash balances. Sash and frames come

completely assembled into window or Slide-A-Sash units. Ventilating Glass-Wall unit sash are 1 1/2" thick, glazed with wood beads and weatherstripped. Glass-Wall units 2' 3 1/4" high are glazed DSA. 1/2" insulating glass is optional. Stationary Glass-Wall units 4'-6 1/2" high and 6'-9 1/2" high are glazed 1/2" polished plate with 1" insulating glass optional (see page 67).

EXTERIOR DOOR FRAMES

1 1/2" rabbeted, with 1 1/2" oak sills.

EXTERIOR DOORS

1 1/2" thick, glazed, solid core birch flush type prefitted for hardware. Interlocking threshold and spring type head and side weatherstrip installed. Exterior doors and frames are assembled in complete units, including oak sill, threshold and weatherstrip. Clear Douglas fir doors are optional (see page 66).

INTERIOR DOORS

1 1/2" thick, hollow core, flush birch, prefitted for hardware.

CLOSET DOORS

(In bedrooms) 1 1/2" sliding louver doors of clear ponderosa pine 7'-8" high. Sliding hardware is included. 1 1/2" flush birch or Space-master fabric doors are optional. 1 1/2" sliding flush doors 6'-8" high optional for certain plans (see page 65).

INTERIOR TRIM

Clear ponderosa pine TOX-I-SEALED door and window trim (casing 11/16 x 2 1/4) mitred and carton packed. Shelving is steel prefinished - tan finish baked on with front edge formed for hanger rod and plastic clothes hooks attached.

BASEMENT STAIRS

Fir or hemlock 2 x 8 stringers gained for 2 x 10 treads. Open risers. Stairs are assembled.

FINISH HARDWARE

Solid brass cylinder front and rear door locks - keyed alike. Tubular type locks for interior doors, polished brass finish. Sash locks and lifts are the same. Door butts are steel, dull brass finish.

KITCHEN CABINETS

Hardwood with natural birch finish and brushed bronze hardware. All steel cabinets with white baked-on finish optional (yellow, blue or tan finish, also optional see page 68). One piece Formica top and 4" backsplash with 21 x 32 double bowl sink built in. Chrome plated mixing faucet and strainers included. Rolled back and front edge type top optional (see page 68). Wood or steel cabinets same price (except extras). Built-in range and oven, waste disposal, fans, etc. optional (see page 68).

BATH CABINETS

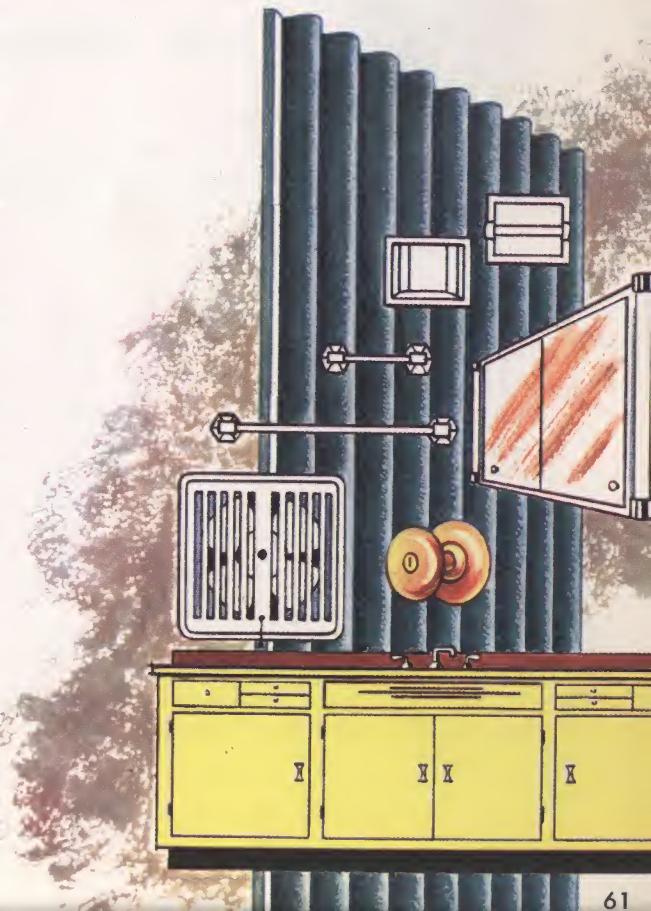

Enamored steel, with 16" x 24" plate glass mirror and stainless steel banding. 60" vanities with 1/2" plate glass wall mirror replace bath cabinets in plans No. 147 and 148. Cabinets with side lights optional (see page 69).

BATH ACCESSORIES

Six piece set (paper holder, 2 towel bars, soap and grab bar, soap holder and toothbrush and tumbler holder), chrome finish. Four piece set with vanities.

Another test performed by the H. C. Nutting testing laboratories shows a 10'6" lintel under hydraulic jack applied loads of two times the normal imposed load without structural failure. Another assurance of "hidden" superiority in a Pease Home.

PEASE HOMES

are shipped by truck or rail...

Pease Homes are shipped by either truck or rail freight, whichever you prefer and specify. If shipped by truck, 2, 3 or 4 loads are necessary to complete delivery (see table on page 72 for number of loads per home). Any plan with bulky "extras" added may require another truck load. On homes shipped in two loads, the "first" load includes floor framing, wall panels, trusses and other materials necessary to put the home under roof. A 24' x 40' re-enforced water proof tarpaulin is included with this load to protect materials at the job site until they are ready for use. The "second" load, which comes in an enclosed van, contains assembled windows and exterior door units, plasterboard, insulation, kitchen cabinets, oak flooring and other finish items that can be stored inside the home and kept dry until used. Truck deliveries are usually made by 8 A. M. to insure a full day's work although exact time of

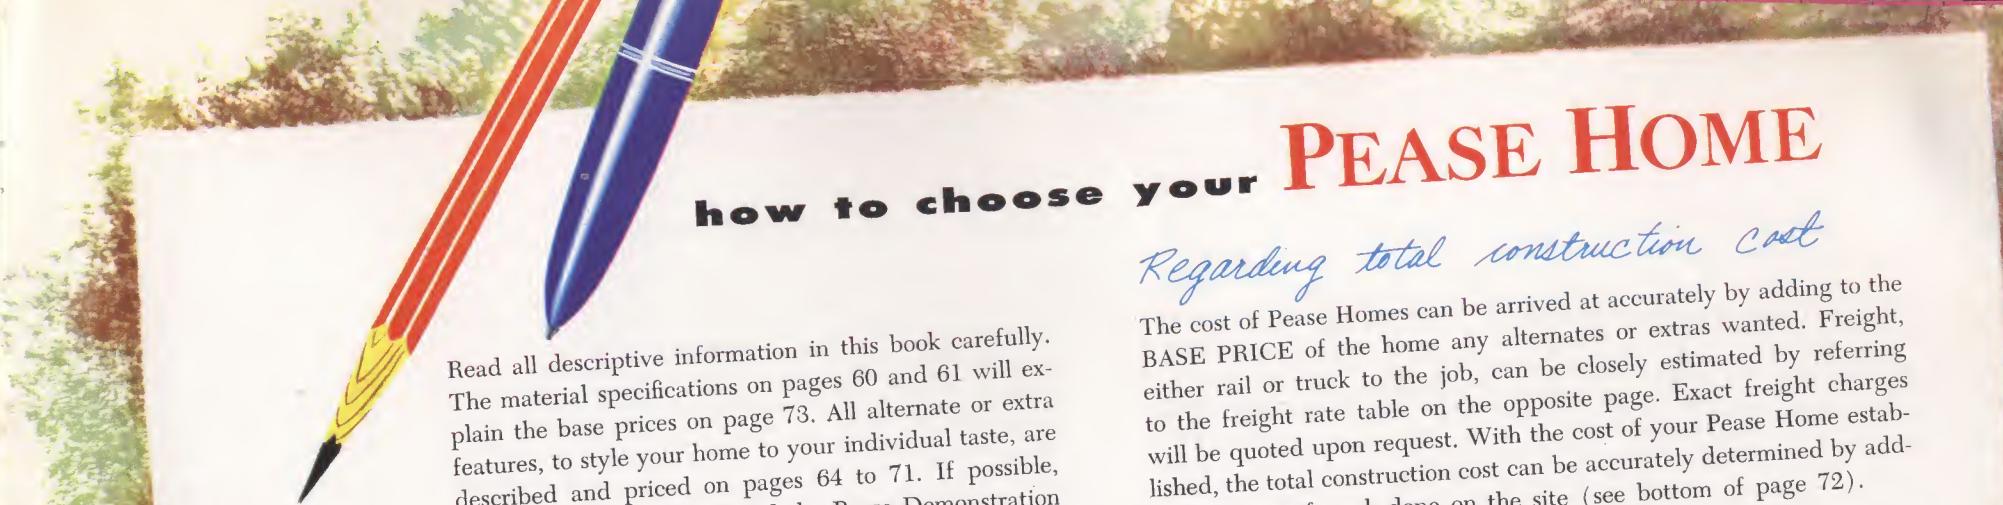

arrival cannot be guaranteed. Truck freight charges are payable to the truck driver as each load arrives, or can be prepaid if included in your remittance. All truck and rail cargoes leaving the Pease Home factory in Hamilton, Ohio, are fully insured by the carriers against loss or damage in transit.

By rail freight, all homes, including desired extras, are shipped as one carload, on which the freight charge is based on actual weight with a minimum of 24,000 lbs. All rail shipments originate on the Baltimore & Ohio Railroad, and will be routed for delivery on the railroad siding specified on your order. 48 hours free time is allowed for unloading of the car following arrival at destination. Shipping weights of homes are listed on page 72, for your convenience. We will gladly quote exact freight charges upon request.

FREIGHT RATE TABLE*
(Comparative rates — Plan 10 - 36,900 lbs.)

Distance (miles)	By Truck	By Rail
35	\$ 62.84	
60	84.46	
100	126.70	
150	178.20	
200	220.42	\$ 183.40
250	282.22	192.12
300	330.64	222.69
400	461.44	244.52
500	516.66	288.19
600	607.30	323.13

*Rates for truck and rail freight are approximate, but include 3% Federal Tax on freight. Truck freight charges are "per home" based on two truck loads of 22,000 lbs. (minimum) each delivered to the building site. Rail freight charges are "per home" based on one carload of 36,900 lbs. (24,000 lbs. minimum). Add transfer costs from nearest rail siding to job site.

how to choose your

PEASE HOME

Read all descriptive information in this book carefully. The material specifications on pages 60 and 61 will explain the base prices on page 73. All alternate or extra features, to style your home to your individual taste, are described and priced on pages 64 to 71. If possible, visit and inspect at first hand the Pease Demonstration Homes at Hamilton, Ohio (described on page 1). Select the home that best suits your needs and obtain from our sales representatives, or write to us, for all information that you require.

You may order plans in advance

Four complete sets of plans and material specifications are included in the purchase price of each Pease Home ordered. These are generally needed prior to the time your order is placed so that total construction costs may be accurately determined. To order plans in advance, send us \$10, and clearly state the plan number wanted, whether right or left hand and whether any attachments such as garages, breezeways, porches, etc. are wanted. Separate plan sheets for such standard attachments are then included without additional charge. Plans may also be purchased at the Demonstration Homes or at our office in Hamilton, Ohio. Plans purchased and paid for in advance will be credited to the purchase price of the home, if claimed, when your order is subsequently placed. Plans are not returnable for credit at any time. "Right hand" plans (i.e. living room on the right side) will be sent unless "left hand" plans are specified.

Order a sample and color kit, too!

A carton packed kit containing over 100 actual colors and samples of items used in Pease Homes will be sent for \$5. Complete samples of Broadside and asphalt shingles, Formica countertop colors, roofing colors, plus actual samples of oak flooring, trim, plasterboard, siding, plywood, sheathing paper, etc., aid immeasurably in advance planning and accurate color selection. The cost of the kit is credited, if claimed, on a Pease Home when ordered. Kits are not returnable for credit at any time.

Regarding total construction cost

The cost of Pease Homes can be arrived at accurately by adding to the BASE PRICE of the home any alternates or extras wanted. Freight, either rail or truck to the job, can be closely estimated by referring to the freight rate table on the opposite page. Exact freight charges will be quoted upon request. With the cost of your Pease Home established, the total construction cost can be accurately determined by adding the cost of work done on the site (see bottom of page 72).

About financing

With the total construction cost established and clear title to your lot, interim (or construction) and permanent financing can then be arranged through your local lending institution. All Pease Homes are designed to exceed most FHA and VA minimum property requirements. They are also readily accepted for maximum term mortgages by banks, building and loan associations, insurance companies and other lending institutions. If funds for construction will come from a loan, a written commitment for both construction funds and the permanent mortgage funds should be obtained immediately after deciding which home to build. Then, your order should be placed and on-site construction may begin.

How to order your home

Orders for Pease Homes may be placed by mail or in person with our sales representatives at the Demonstration Homes or Office in Hamilton, Ohio. It is always advisable to use our prepared order form to insure accurate and complete specifications (and thus avoid delays in shipment due to changes or errors). A confirmation of your order together with nearest available shipping dates will be sent to you promptly upon receipt of your signed order.

Our terms

A cash discount of 2% may be deducted when check in full accompanies order, or is received by us at least 3 days prior to scheduled shipment of the first load. Freight charges (net) will be prepaid, if desired, when included in your remittance. All prices quoted herein are subject to change without notice. Written quotations are protected for 15 days.

KITCHEN VARIATIONS

Standard Top

Roll Form Top

Alternate Kitchen Cabinet Arrangement with Tappan built-in range and oven (wood or metal cabinets—standard sink top) in place of standard kitchen arrangement..... add

Tappan Built-In Electric Oven Features

- Inside-dimensions: 17" wide, 15" high and 20 $\frac{1}{4}$ " deep.
- Fiberglas insulation: Oven is fully insulated and has Underwriters' Laboratories approval.
- Wattage: two 1000 watt elements for baking, 2900 watt element for broiling.
- Visulite Door and "Peek" light: Lets you see what's cooking without opening the oven door.
- Chrome Oven with Convek Heat: Chrome lined oven reflects heat for faster heating, better browning.
- Broiling Baffle and Deep Broiling Pan minimize spattering and smoking.
- Lift-off Door enables you to clean every corner of the oven in a jiffy.
- Eye-Level Control Panel: Lets you set the dials without stooping or squinting, easy to read and set even when oven door is open, out of children's reach, has automatic electric clock, 60 minute timer, Robertshaw temperature control, bake and broil indicator lights, circuit breaker and peak switch. Control panel is easily removed from oven for servicing.
- Can be used with wood or steel cabinets: when furnished for wood cabinet kitchens, a 24" x 82" oven cabinet is furnished to receive the oven which has a "Copperloy" finished door. When furnished for steel cabinet kitchens, a 24" x 28" oven base cabinet (below the oven) is furnished and the oven and oven cabinet are finished in beautiful "Lusterloy" (brushed chrome).
- Requires separate circuit, 3-wire single phase, 120-240 volt, 60 cycle current. Total connected oven load is 4.9 KW.

With wood cabinets

Tappan Built-In Electric Range Features

- Flush mounted in Formica counter top—simple clamp-in installation.
- Overall dimensions: 33" wide by 20 $\frac{1}{2}$ " deep.
- Speed-flex units: two 6" (1250 watt) and two 8" (2100 watt) cooking elements.
- 7 speed cooking control switches for each cooking element are located to the rear of the top for safety and convenience.
- Deep spillover bowls under each element are easy to remove, easy to clean.
- Approved by Underwriters' Laboratories.
- Lusterloy (brushed chrome) finish is easy to clean.
- Range Cabinet, 36" wide matches other wood or steel base cabinets in appearance and has two shelves and two doors for added storage.
- Requires separate circuit, 3-wire single phase, 120-240 volt, 60 cycle current. Total connected range load is 6.7 KW.

With steel cabinets

NOTE: If Window, Slide-A-Sash or Door sections wanted in place of Blank Wall sections, use prices on pages 66 and 67. Open Carport is priced on page 70.
Garage doors may be installed in *front*, at *end* or in *rear*, please specify.
Deduct for windows or doors omitted on end of home when garage is attached, see pages 66 and 67.

Standard 9'0" x 7'0" garage doors are 10 panel (see page 69).
30 panel garage doors same price when specified.

what PEASE HOME base prices include

The base prices for all plans shown on the opposite page include all assembled exterior wall and gable sections, interior partitions and assembled exterior wall and gable sections, interior partitions and assembled roof trusses, $\frac{1}{2}$ " plywood roof sheathing, 15 lb. saturated felt and 240 lb. asphalt roof shingles. Siding consists of red cedar Broadside shingles with undercourse shingles. Black sidewall sheathing paper and furring strips are also included. Ceiling insulation and plasterboard (or lath) for walls and ceilings are furnished, but not applied. Glazed windows and exterior doors come weatherstripped in assembled units, with interior trim pre-cut and carton packed. Interior doors are pre-fit to net size, bored for lock and routed for hinges with hinges installed in side jambs. Base, shoe, exterior finish, etc., all come bundled in standard lengths. Metal shelving comes cut to proper lengths. Natural finish birch kitchen cabinets are assembled and completely finished with a one-piece Formica top and twin sink bowls built in. (Steel cabinets are optional.) Bath cabinet and accessories are included.

Material is neither primed nor painted, except prime coated Broadside shingles, metal shelving and completely finished kitchen and bath cabinets.

Nails, finish hardware, truss anchors and tape and cement for plasterboard joints are furnished in proper quantities.

Included with all homes for basement are glazed aluminum basement windows (complete with aluminum screens), pre-cut floor joists and solid bridging; assembled girder, box girders nailed to sill plates, and plywood belt course; assembled basement stairs, metal joist anchors and $\frac{1}{2}$ " plywood sub floor for the entire home. No. 1 common (unfinished) oak flooring is included for all rooms except the kitchen and bath, for which $\frac{3}{4}$ " plywood linoleum underlayment is furnished.

Homes for crawl space receive aluminum coated re-enforced duplex paper to go under the joists.

What PEASE HOME base prices do not include

Base prices do NOT include any foundation masonry materials, plaster, plumbing or plumbing fixtures (except kitchen sink and faucet), heating, wiring or electrical fixtures, linoleum, painting or decorating, gutters, flashing or field labor. For complete material specifications see pages 60-61.

OTHER VARIATIONS or EXTRAS:

**BASE PRICES
FOR
PEASE HOMES**

All odd numbered plans are available for crawl space. To price of home "for slab" add extra for wood floor deck. (See page 64). The base prices of all Pease Homes include 5 in 12 pitch roofs except the Shorewood which is priced with flat roof. Roofs of 3 in 12 pitch are quoted as an alternate. (See page 64). All Pease Homes are available "RIGHT HAND" (with living room on right) or "LEFT HAND" (with living room on left) at the same price.
